Autodesk® Building Design Suite is a comprehensive building software solution, combining the tools building professionals need for both CAD and Building Information Modeling (BIM) workflows in a single economical and convenient purchase. The Standard version of the suite combines AutoCAD and the AutoCAD products specifically designed for building designers, drafters and detailers. The Advanced version of the suite contains everything in the Standard version but adds the power of Building Information Modeling (BIM) for architects and engineers while the Ultimate version builds upon the value of the Premium version by adding tools that are ideally suited for construction professionals.
